Lab 1 — Research Brief and Requirements

Sample prompts and code · A1 · LO1

prompt.txt

```
Goal: research-backed product brief, required-function list and measurable success criteria
Audience: Adults using a community wellness service, including users with varied digital confidence and
  accessibility needs.
Context: A neighbourhood wellness service needs a mobile experience for daily support and appointment
  booking.
Required content: Use realistic service names, appointment times, success, empty, loading, permission and
  error states.
Design system: Use the supplied tokens and component rules. Prefer clear labels, visible focus, 44px minimum
  targets and strong contrast.
Constraints: Mobile-first; no lorem ipsum; one dominant primary action per screen; preserve user input on
  recoverable errors.
Acceptance: Names a primary user and job; Separates evidence from assumptions; Lists essential functions;
  Defines observable success
Output: Create the named design in Claude Design, save a version checkpoint and export or share the evidence
  requested in the README.
