Lab 8 — Documentation, Export and Handoff

Sample prompts and code · A6 · A7 · LO4

prompt.txt

```
Goal: versioned export bundle, decision log, handoff brief and task-based user guide
Audience: Adults using a community wellness service, including users with varied digital confidence and
  accessibility needs.
Context: Prepare the final prototype for stakeholder review, developer handoff and end-user guidance.
Required content: Use realistic service names, appointment times, success, empty, loading, permission and
  error states.
Design system: Use the supplied tokens and component rules. Prefer clear labels, visible focus, 44px minimum
  targets and strong contrast.
Constraints: Mobile-first; no lorem ipsum; one dominant primary action per screen; preserve user input on
  recoverable errors.
Acceptance: Change log explains rationale; Export matches downstream need; Guide supports a real task;
  Handoff includes states and acceptance
Output: Create the named design in Claude Design, save a version checkpoint and export or share the evidence
  requested in the README.
```

CHANGELOG.md

```
# Changelog

## v1.1 — 23 August 2026
- Improved unavailable-time recovery based on Lab 7 evidence.
- Preserved selected service and moved focus to the time field.
- Added a plain-language error and suggested next action.
```

HANDOFF.md

```
# Handoff

## User goal
Book or reschedule an appointment with recoverable conflicts.

## Design system
Use tokens.css and the component state matrix from Lab 5.

## Required states
Loading, empty, unavailable time, success, permission denied.

## Acceptance
Keyboard complete; visible focus; selection preserved; status announced; mobile and desktop verified.
```

USER-GUIDE.md

```
# Book an appointment

1. Choose a service and an available time.
2. Review your selection and choose **Confirm booking**.
3. Check for the confirmation message.

If the selected time becomes unavailable, choose another suggested time. Your service selection remains
  saved.
```

export-checklist.md

```
# Export checklist

- [ ] Named version checkpoint saved
- [ ] Sensitive data removed
- [ ] Correct downstream format selected
- [ ] States and responsive views included
- [ ] Design-system files included
- [ ] Decision log and user guide included
- [ ] Export opened and verified
```
